Filesystem

- A **filesystem** is the methods and data structures that an operating system uses to keep track of files on a disk or partition; that is, the way the files are organized on the disk.
  - http://www.tldp.org/LDP/sag/html/filesystems.html

- A drive formatted by a Mac cannot be read using a PC.

Kyroflux

- Read at lowest level possible - precisely sampling the magnetic flux transition timing.
- Save as raw stream, or export to common sector formats supporting.
